

## MULTI-VIEW

- + for recording of process data
- + for all MULTI controller units
- + Ethernet connection
- + with PC software for WINDOWS<sup>®</sup>

### Data Interface

This interface allows transmission of all process data of one MULTI controller unit via Ethernet.

The interface box is connected to the standard data interface of the controller unit, the Ethernet interface is provided on the unit's output. The unit comes complete with an external power supply.

After installation of the included MULTI-VIEW software, all data can be stored in a user-selectable WINDOWS<sup>®</sup> folder, making them available for later editing by BDE / BDA systems or similar use.
